WHY JUST MASK ODORS WITH CHEMICALS AND PURIFIERS THAT DON'T DESTROY THE SOURCE OF SMELLS?

Chemicals, perfumes and most air purifiers do a great job of masking smells. But why just cover up odors when you can get rid of their sources?

EdenPURE® OxiLeaf™ works with proven Oxi-Technology to quickly destroy the worst odors. It freshens, energizes and purifies the air you breathe. It can even kill germs from contaminated surfaces we touch. OxiLeaf is the only way to naturally and effectively REMOVE odors while creating pure, oxygen-rich air.

Order Your OxiLeaf™ Now
Hurry, supplies are LIMITED

Did you know? Many air purifiers don't kill the MOST DANGEROUS pollutants in your home.

New studies have found that spring and summer indoor air pollution is the worst of the year. This is mostly due to the fact that air conditioners create condensation in ductwork. This damp environment breeds bacteria, viruses and mold continuously. All this can cause serious illness and even death, especially black mold which puts deadly spores into the air we breathe. Mold also contributes to allergies and asthma.

Many air purifiers such as HEPA filters and static air purifiers do not affect or remove these dangerous pollutants. A new, high-tech air purifier, the EdenPURE® OxiLeaf™, does remove these dangerous pollutants through oxidation in the air and on surfaces. It also removes other pollutants that aren't removed by old-style filtration type air purifiers.

The best HEPA filters vary in size from tabletop units weighing 5 to 10 lbs. to top rated HEPA weighing 30 to 40 lbs. and have a noise level of up to 80 decibels, which is about that of a leaf blower. The new high-tech EdenPURE® OxiLeaf™ fits in the palm of your hand and runs almost silent. It purifies the air much better than all of those outdated purifiers.

Hint: They LOVE it!

How does OxiLeaf™ work?

Ionic technology produces "super oxygen" that purifies your air the same way nature does after a thunderstorm

The EdenPURE® OxiLeaf™ produces ions, which restore the air to a healthy state. Nature produces these ions in large doses during a thunderstorm. That's why the air is energized and smells so fresh after a thunderstorm. This super-oxygen is the way nature purifies the air.

The EdenPURE® OxiLeaf™ uses this same ionic technology found in nature to remove pollutants and to naturally purify the air. It removes all odors including pet odors, cigarette odor, urine odor and cooking odors. It also removes smoke, pollen, dust, pet dander, carbon monoxide, and kills dust mites. It removes virtually all pollutants, organic and inorganic, including toxic gasses. It relieves allergies and sinus problems caused by air pollution.

Most air purifiers require the air to be brought to the unit. But the worst air never comes to the unit. The micro-sized EdenPURE® OxiLeaf™ produces and sends out super-oxygen molecules that attack all pollutants in every square inch of an area, including behind objects. These super-oxygen molecules act as deadly missiles that destroy up to 99.9% of air pollutants and turn them into harmless vapor and ash. No matter where the pollution is, it cannot hide from these super-oxygen missiles, including surfaces.

The EdenPURE® OxiLeaf™ removes odors better than anything else on the market. It can be used to wipe out odors from gym bags, cars, pet areas, stinky shoes, closets, musty basements, worst cooking odors. It also removes smoke and dust. The EdenPURE® OxiLeaf™ will totally restore the air in a musty basement, attic, bathroom or kitchen. It will also totally remove odors and restore the air in automobiles and RVs, and it's perfect for travel. It's made with proven micro-electronic technology, so it fits in the palm of your hand.

A good HEPA room air purifier averages \$400 in cost, and the best rated Whole House HEPA and static air purifiers can cost over \$1,500.00.

In comparison, you can put an EdenPURE® OxiLeaf™ in every room of your house for less than the cost of just one Whole House HEPA air purifier. Plus, HEPA air purifiers require constant replacement of expensive filters and static air purifiers need cleaned constantly. But the EdenPURE® OxiLeaf™ has no filters to replace and nothing to clean.

You simply plug it into an electrical outlet and forget about it!

What OxiLeaf Can Do for you

Uses Ozone to Oxidize

Through the oxidative power of ozone, OxiLeaf helps reduce the chemical byproducts like VOCs and glues that go hand-in-hand with remodeling work like painting, new cabinetry, new flooring and much more.

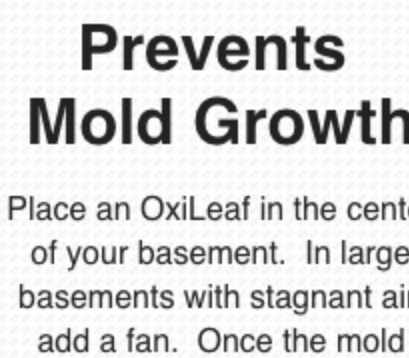

Refreshes Bedrooms

Pull the sheets back to expose the bare mattress. Put an OxiLeaf under a tent made of a sheet over pillows. The difference can be dramatic! Sanitize as often as you want!

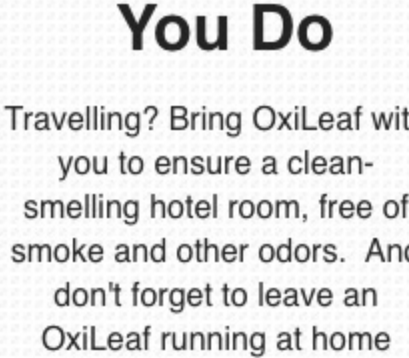

Sanitizes Bathrooms

Bathrooms tend to get musty and potentially even moldy due to moist conditions. Run OxiLeaf full-time to keep your bathroom fresh and to control mold and bacteria.

Prevents Mold Growth

Place an OxiLeaf in the center of your basement. In large basements with stagnant air, add a fan. Once the mold smell is gone, run an OxiLeaf full time to prevent future mold growth.

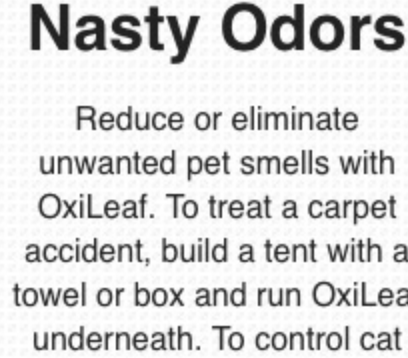

Goes Where You Do

Travelling? Bring OxiLeaf with you to ensure a clean-smelling hotel room, free of smoke and other odors. And don't forget to leave an OxiLeaf running at home while you're gone so you can come back to a fresh, revitalized home.

Freshens & Renews Closets

Hang unwrapped clothing in closet or small room. Treat with the full power of OxiLeaf. Set OxiLeaf inside your closet (extension cord may be required) to get rid of bacteria and odors.

Eliminates Nasty Odors

Reduce or eliminate unwanted pet smells with OxiLeaf. To treat a carpet accident, build a tent with a towel or box and run OxiLeaf underneath. To control cat box odors, plug in an OxiLeaf nearby to sanitize and freshen the area.

Protects Your Home

Place an OxiLeaf directly in front of your return air intake. Set fan to ON for 12 hours or longer. If you leave for a weekend, do this while you are away. Think of this as a quick and easy home ventilation system.

Customers Rave about OxiLeaf

Never Travel Without It

"I absolutely love my OxiLeaf and will never travel without it. During my last business trip to Atlanta I stayed in what should have been a non-smoking room. As someone who is highly allergic to smoke I knew someone had smoked in that room due to the reaction I was having. I quickly remembered I had just received my OxiLeaf. I was a little pessimistic that it would work as I have tried so many other things and have always been disappointed. My husband and I decided to plug it in and go get dinner. To my surprise when we got back about 45 minutes later the room smelled fresh and clean. I couldn't believe that the smoke smell was completely gone. Both my husband and I had the best sleep we've had in years and we didn't wake up with any allergies like we normally do. I would highly recommend the OxiLeaf to anyone that suffers from allergies as I do or for those sensitive to smells. I know what I will be getting my family as gifts."

Gina Lovett
Smart Bargain & Deals Retailer, Santa Rosa Beach, FL

Tough on Toxic Gases

"My wife and I have always been conscious of air quality. When we heard about the OxiLeaf Air Purifiers we bought two, one for our bedroom and one for my home office. The day I got the OxiLeaf we had plumbers working on a sewer pipe in our basement. We had a lot of sewer gas in the bathroom so I plugged in an OxiLeaf. Within a short time the smell was gone! Unbelievable! It's incredible the amount of ozone that one OxiLeaf puts out. Our home smells fresh and clean! We also really like fact they are small enough to stick into a suitcase to travel with. Another great product making a HAPPY customer!"
