

NASA-Trained Engineer Invents Personal Climate Control System and Creates Formula for Perfect Sleep

Never Wake Up with Night Sweats or Fall Asleep with Cold Feet Again

Media Services

EdenPURE® is announcing its partnership with BedJet®, an advanced new cooling and heating system for your bed that can save you money throughout the year, while giving you the most perfect sleep you’ve ever had.

Because of this special partnership with TV-famous BedJet, a special \$100 discount is being offered to readers of this publication. This special discount ends in 10 days from this publication date.

BedJet is the first personal climate system that lets you cool or heat your bed to a desired temperature within a matter of 3 minutes. It’s not an electric blanket or a fan. BedJet is a quiet, ultra-rapid climate control system. It’s designed by a former NASA contracted engineer, whose work on providing climactic control for space suits helped him design this revolutionary sleeping system.

BedJet works by transferring warm and cool air throughout your bedsheets by the process of convection. And much like the life-saving climactic controls on NASA space suits, BedJet is a personal climate system. BedJet is designed to give you total control of your sleeping comfort.

Good sleep is one of the most important parts of a healthy lifestyle. When sleep patterns are interrupted by body temperature changes, it can be very harmful to your health. Sleep loss is proven to impair judgement, make you forgetful and can even lead to heart disease, heart attack, high blood pressure and diabetes.

Do you wake up at night to kick the covers off or to add another layer of clothing? If so, then you have interrupted sleep. So before you start to feel the negative effects of sleep loss, try personal climate-controlled BedJet for the perfect sleep.

With EdenPURE’s BedJet, you’ll never get too hot in the middle of the night because your mattress retains heat and makes you sweat. And, why would you turn your air conditioning up at night just so you can sleep? That’s a waste of energy, especially because it’s cooler at night. With one touch on your remote or phone app, BedJet fills your bed with comfortable, refreshing air for the perfect sleeping temperature.

Did you know that The Department of Energy says that you can save up to 4% on your heating bill for every degree your thermostat is lowered? Now you can turn down your thermostat when it’s cold at night, saving on heating bills. And instead of getting into a freezing cold bed, with socks and layers of clothes, imagine BedJet gently warming your bed, wrapping you in warmth like hot towels from the dryer.

BedJet works with your existing bedsheets and takes only one minute to install. Unlike electric blankets that can take up to an hour to raise your bed temperature by 20 degrees, BedJet raises the temperature of a king sized bed by 30 degrees in just minutes. And with BedJet, there’s no worry about potential harm and burns while you’re sleeping, like with electric blankets.

Even though it produces such powerful heat, the BedJet emits warm air equivalent to the

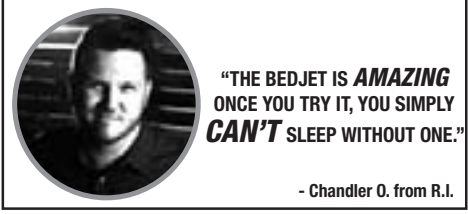

BedJet is not a fan or electric blanket. It works by the process of convection, transferring cool and warm air throughout your bed.

“BEDJET COOLING WORKS **WONDERFULLY.** IT HELPS ME GET DEEP SLEEP THROUGH **THE WHOLE NIGHT.”**

- Mary A. from CT.

“THE BEDJET IS **AMAZING** ONCE YOU TRY IT, YOU SIMPLY **CAN’T** SLEEP WITHOUT ONE.”

- Chandler O. from R.I.

BedJet is the new ultra-rapid personal climate system that keeps your body temperate all night long, to give you the perfect sleep every time. It installs in a matter of minutes and is compatible with any existing bedsheets.

NO MORE KICKING OFF THE COVERS WITH NIGHT SWEATS!

NEVER BUNDLE UP JUST TO GO TO BED AGAIN!

safe temperature of your home HVAC air register vent. But safety doesn’t end there. The BedJet contains a sophisticated microprocessor that constantly adjusts to maintain consistent and safe temperatures. This microprocessor also ensures BedJet automatically shuts off if there is a blockage or problem of any sort.

In line with EdenPURE’s other healthy home products, BedJet has a lifetime washable air filter. The only maintenance your BedJet will ever need is cleaning its lifetime filter once every three months by running it under some water.

And because of its patent-pending acoustic damping technology, BedJet runs much quieter than even a window air conditioning unit or a fan.

BedJet can either be con-

trolled with a remote or a phone app, allowing you to turn it to your desired temperature before you get in bed, even from another room!

And BedJet’s timer system ensures that you can shut it off at any time of the night. You can even set it to wake you up with a warm or cold blast of air in the morning.

You can even customize your BedJet experience. The BedJet Dual Zone Climate Control System allows you to stay toasty warm at night while your partner can adjust their settings for a cooler night’s sleep. Talk to a representative to see how to turn your BedJet into a Dual Zone Climate System.

The regular price of BedJet is \$499.00 plus \$21.00 shipping and handling. However, readers of this publication are being
